
Objective

Software Developer with hands-on experience in Java and Spring Boot. Proficient in developing REST APIs, implementing authentication, and working with relational database. Strong problem-solving skills with a focus on delivering reliable and scalable solutions.

Experience

Gtechnohub Solutions Pvt Ltd (Present)
JAVA Developer

- Developed and tested REST APIs for authentication, product management, and booking workflows.
- Implemented CRUD operations using Spring Boot with JPA/Hibernate for efficient data handling.
- Designed normalized database schema and wrote optimized SQL queries for performance.
- Applied input validation and global exception handling to improve reliability.
- Followed MVC architecture and layered design .
- Used Postman for API testing and debugging of request/response cycles.
- Implemented secure user authentication with password encryption, input validation, and role-based access control.
- Wrote clean, modular, and reusable code following standard conventions.
- Troubleshoot bugs and improved application performance through profiling and query optimization.

Education

- BGS Institute of Technology 2024
Bachelors of Technology in Electronics and Communication and Engineering
8.35 cgpa.
- Times PU College 2020
Senior Secondary (Class XII)
87 %.

Skills

- Languages: Java, Python, C
- Backend Development: Spring Boot, RESTful APIs, JDBC
- Database: MySQL, SQL., Database Design
- Web Technologies: HTML, CSS, Basic JavaScript .
- Frameworks Libraries: Spring Boot, Hibernate
- Tools Platforms: Rent Git, GitHub, Postman, Eclipse.
- Concepts: Object-Oriented Programming (OOP), MVC Architecture, Data Structures (Basics), API Development
- Other Skills: Debugging, Problem Solving, Code Optimization

Projects

- Job Portal (Spring Boot | Java | MySQL)
 - Developed a Job Portal application for Students, Recruiters, and Admin to simplify the hiring process.
 - Built RESTful APIs using Spring Boot for user management, job posting, job search, and job applications.
 - Implemented Spring Security and JWT for secure login, registration, and role-based access.
 - Developed modules for job posting, job applications, resume management, and candidate tracking.
 - Built coding assessment and mock interview features to help candidates improve their technical and interview skills.
 - Implemented video resume upload, recruiter-candidate chat, company reviews, and salary insights.
 - Integrated MySQL using Spring Data JPA/Hibernate for efficient database operations.
 - Added search, filtering, pagination, input validation, and global exception handling for a better user experience.
 - Followed MVC architecture and clean code practices for maintainability and scalability.
 - Used Git for version control and team collaboration.

Interests

- Playing Sports, Travelling and Exploring, Cooking.

Languages

- Kannada. English.
